5.4HD: Panel Presentation

Overview of the Task

You have now been working with your Team for a few weeks. You have made lasting contributions to the company which you are leading – helping to shape the company, its teams, products, processes, technologies, or documentation. We now want to give you an opportunity to showcase the exceptional work you have been doing.

Steps

For this task, you must present your achievements as an individual to a panel during your allocated **Expert Panel presentation** in **Week 6**. This is your opportunity to bring together all the work you have undertaken and to receive feedback to help support you in achieving even more in the remainder of the trimester.

Prepare a **3-minute presentation** that outlines your achievements for the trimester and reflects upon what you have learnt through this process.

Please keep in mind the persona associated with the assessment rubric and the overview from the Capstone Rubric. You want to demonstrate that you are clearly exceeding the Distinction criteria and showcase your areas of excellence. These can be aspects where you have gone above and beyond what is expected of most team members, achievements of very high quality, or contributions that are having significant positive impacts on your company or a capstone cohort.

Submission

Convert your presentation to PDF and upload to [OnTrack](#). Note that if the size of the file is large (e.g., > 5MB), please upload the presentation slides to your Teams' channel and provide a link to it as a comment in the [OnTrack](#) task.

Submissions must be on time for us to schedule panel presentation times. In the panel meeting you will have the opportunity to talk through your presentation, and then there will be ample time for discussion and feedback.
